Full Stack Web Developer with a background in Printing and Publishing with a dedication to make a finished product well presentable and polished. Taking my experience of inspecting for the highest quality, how things look pleasant to the eye, and making a finished well polished product into the world of web development. Known to be reliable and strong attention to detail, no matter the complexity of the project.

TECHNICAL SKILLS

Languages: HTML5, CSS, Javascript, React.js, Bootstrap.js, Materialize CSS, Material-UI, Express, Node.js, Handlebars.js, MySQL

PROJECTS

Find Next Gig
https://github.com/Merkraith/Band-Tour-Manager
https://merkraith.github.io/Band-Tour-Manager/Project
- This project used an API that had concert information, and connected it with a Map API that would return the upcoming concert information to what the user searched for.
- Front-End role of utilizing Materialize CSS into the project and creating the interface.
- HTML, CSS, Javascript, Express, Node

Watcher
https://github.com/nobobobo/watcher
https://quiet-shelf-40896.herokuapp.com/
- This project uses a map api, and has a message feed. When the user enters a message, it shows their location and message on the map.
- Front End role of using Bootstrap and Materialize CSS, implementing handlebars for the message feed.
- HTML, CSS, javascript, Express, Node, MySQL, Handlebars
